A59.2207 Digital Camera, C Mount + Eyepiece Type

Our latest generation of cameras features upgraded electronics, streamlined software, and a compact design with smaller dimensions and reduced weight.

Featuring built-in C-mount compatibility and 23mm reduction lens adapter, our camera can be attached to any instrument with a C-mount or a 23mm photo port, including microscopes, telescopes, endoscopes, and etc. The camera's optics offers max 4384*3288 pixel resolution, and the included software allows you to capture real-time, high-definition videos and stills without requiring any additional equipment.

The included user-friendly software allows you to make notes, shapes, watermarks, and measurements with ease. You can analyze, present, and share images of samples and specimen by simply plugging one end into your PC's USB 2.0 port, and the other on your microscope's eye-tube or trinocular port.

In addition, the newest generation of camera comes with a preassembled 0.5X reduction lens named as Eyepiece Tube, giving your PC screen the same field of view as your microscope's eyepiece. With the reduction lens in place, your camera tube is 23mm in diameter, making it compatible with pretty much any microscope's eyetube or trinocular port! We also include 2 eyepiece adapters for FREE - 30.0mm and 30.5mm.

With its unique stand alone design, the MU series camera is equipped with CMOS color sensor, and comes with a high-speed USB 2.0 cord, advanced software (Windows XP/Vista/7 compatible), 4 mounting sizes (23mm, 30mm, 30.5mm, and C-mount), and instructions.
