Description:

A18.1845-LCD Forensic Comparison Microscope, newly developed in 2013, is suitable to be used for forensic science education & school, to give an idea and training to the students what is a comparison microscope and learn how to use it. It is simple but including full comparison system function, and with steady quality at very competitive price!

Our Product Introduction

Applications:

It is primarily designed for school students to do image analysis and distant sharing.
This unique combination of microscope, image system and software makes it a professional tool for education applications. This microscope also provides a superior cost effective solution for computer interactive laboratory, clinical environments and etc.
