Opto-Edu (Beijing) Co., Ltd.

Opto Edu A12.2255 Laboratory Biological Microscope Fully Motorized BX53 CX43 Level

Basic Information

Place of Origin: China
Brand Name: OPTO-EDU
Certification: CE, Rohs
Model Number: A12.2255
Minimum Order Quantity: 1 pc

Price: FOB \$1~1000, Depend on Order Quantity
 Packaging Details: Carton Packing, For Export Transportation

• Delivery Time: 5~20 Days

Payment Terms: T/T, West Union, Paypal

Supply Ability: 5000 pcs/ Month

Product Specification

Optical System: ECGO Infinity Plan Mutual Achromatic

Optical System, Confocal: 45mm

• Head & Video Adapter: Trinocular Head, Light Split (0/100, 50/50,

100/0), Ultra Wide FN=26.5

• Eyepiece: Ultra Wide Field 10x/23mm, Diopter

Adjustable -2~+8°, With Eyecup

• Nosepiece: 6 Holes Motorized Nosepiece, M20.32 Screw

(RMS)

Objective: UPLN Infinity Plan Achromatic Objective,

Cover Glass- 0.17

• Condenser: Abbe Condenser, N.A=1.1, 4x~100x

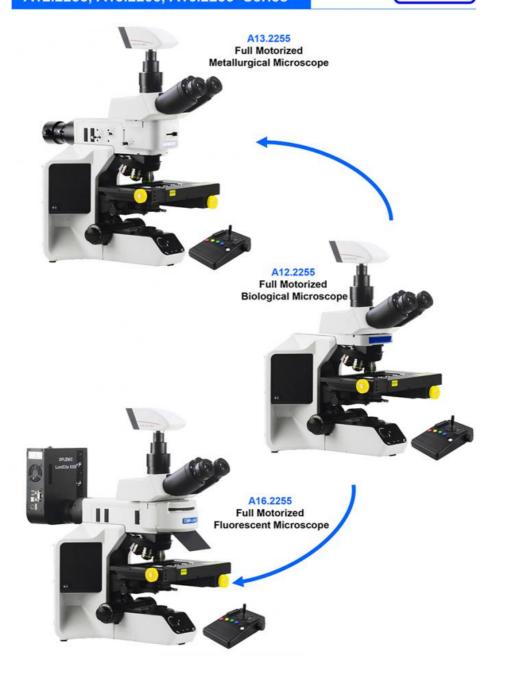

Full Motorized XYZRLCC, Infinity Archromatic Plan Optical System, Confocal 45mm

UPLN or PLCN Infinity Plan Archromatic Objective, 4X, 10X, 20X, 40X, 100X

10W Wide Color Gamut LED Light, Color Temperature 4500K, Sunlight Simulated, Brightness =100W Halogen Lamp
6 Holes Coded Motorized Nosepiece, Support ECO, Brightness Memories

XYZ Motorized Stage, Moving 118x76mm, 4 Slides Holder, Joystick Controller

A12.2255, A13.2255, A16.2255 Motorize XYZRLCC

A12.2255, A13.2255, A16.2255 Software

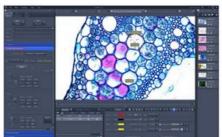

Oplenic Professional Microscope Analysis Software, Support Function:

- --Motorized XYZ Stage Control From Software
- --Motorized Fluorescent Band Switch From Software
- --Motorized Nosepiece Control Switch Objective Lens From Software
- --Calibration Auto Switch For Each Objective
- --Camera Parameter Auto Switch For Each Objective
- --Photo, Video Capture, Calibration & Measure, Parameter Adjustment etc.

A12.2255, A13.2255, A16.2255 Motorize Parts

High-Precision Electric Platform

The electric platform (stepper motor) adopts the same connection and installation method as the ordinary manual stage. With only one bolt, the manual stage can be upgraded and replaced with an electric XY stage. The long X-axis travel can load 1-4 standard slides at same time. It comes with integrated control software, which can centrally operate and control all electronic components of the microscope.

Encoded Electric Z-axis Accessories

The encoded electric Z-axis accessories are composed of a dual-axis stepper motor and a multi-turn encoder, with a minimum step size of 0.8 degrees (360 degrees with 200 subdivisions). The encoder can provide real-time feedback of Z-axis coordinate data. The installation is simple and does not require any damage to the body structure. Only 2 screws are needed to complete the installation, and the structure is firm.

Multifunctional computer drive

It can achieve driving control of components such as the electric objective turntable (R), electric stage (XY), electric Z-axis (Z), camera external trigger, etc. It can communicate with the computer through RS232 and USB ports to achieve software control and programmed action processing.

Electric microscope joystick controller

Equipped with full control over the electric loading platform (XY), electric Z-axis (Z), and electric objective turntable (R), with high, medium, and low speed three speed switches. Change to precise control of XYZ, support up to 6 objective lenses for arbitrary switching, and need to be used in conjunction with M-DRV 200 multifunctional computer driver.

Motorized Condenser

Abbe Condenser, N.A=1.1, 4x~100x

► Light Intensity Management (LIM)
SUPERMLED 10W LED Light House, Lifetime 60000 Hours, Wide Color Gamut 4500K Color Temperature, Kohler Illumination

▶ Button Control Magnification Switching

By touching the button on the body, the magnification of the objective can be switched easily, avoiding pollution, wear, and looseness caused by long-term contact with the objective lens.

► Metallurgical Illuminator

EPI Reflect Illumination, with BF & DF Module, With Polarizing Slot

▶ Fluorescent Illuminator

Turret Epi-Fluorescent Illumination, 4 Holes, Build-In UV, Blue, Green Excitation Module, With Polarizing Slot

▶ Illumination System

Lumi Cite Ultra-High Brightness, SUPERMLED High-Power And Wide Color Gamut LED Light, 60,000 Hours, 4500K Color Temperature, Sunlight Simulated

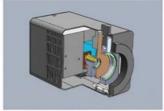

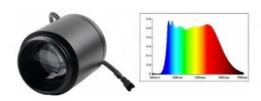

Ultra High Power and Wide Spectral White LED Light Source

A12.2255, A13.2255, A16.2255 Features

Full Motorized .2255 Series Laboratory Research Microscope

- •Full Motorized XYZRLCC, Infinity Achromatic Plan Optical System, Confocal 45mm
- •UPLN or PLCN Infinity Plan Achromatic Objective, 4X, 10X, 20X, 40X, 100X
- •10W Wide Color Gamut LED Light, Color Temperature 4500K, Sunlight Simulated, Brightness =100W Halogen Lamp
- •5/6 Holes Coded Motorized Nosepiece, Support ECO, Brightness Memories
- •XYZ Motorized Stage, Moving 118x76mm, 4 Slides Holder, Joystick Controller

Excellent Optical Properties

The new ECGO infinite bidirectional chromatic aberration calibration system objective lens with a new optical architecture has three zoom distance designs of 45mm, 60mm, and 95mm, which can balance high resolution and long working distance, as well as special biology-specific 40x and 100x coverslip-free objective lenses, making it easier for users to capture microscopic structures of bacteria and chromosomes more clearly during coverslip-free sample detection.

Maintenance-free long-life light source

Transmission lighting uses SUPERMLEDIM large-scale LED light-emitting array packaged with multi-core stack technology, simulating solar light sources. The emission spectrum is uniform and continuous in the visible light range of 400nm to 650nm, with a constant temperature of 4500K. It has high-fidelity color reproduction ability for various stained specimens, especially for colors that are difficult to distinguish under ordinary LED lights such as cyan, purple, and pink, and has super strong color rendering ability.

Antibacterial coating

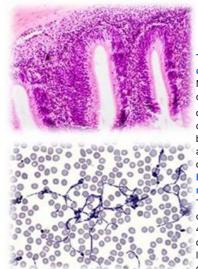

Microorganisms and viruses can be transmitted through contact, so we have treated all contact points with antibacterial additives to create a healthy laboratory environment.

Automatic light intensity management function:

By operating the LIMVSET key and dimming, different objective lenses can be independently set for brightness in advance, so that the brightness can always be maintained in the best state regardless of the magnification switch in daily use.

USB output to computer control

Through the USB data port at the back of the fuselage, it can be directly connected to the computer, and various electronic components of the microscope can be controlled through software, including cameras, stage objective lens turntables, bright field transmission light sources, fluorescent light sources, electric diaphragms, and electric polarizers.

Tissue slice observation does not require cumbersome operations and complex settings

No special settings are required, and the factory mode can achieve perfect observation of tissue sections stained with conventional H. E staining; the specially designed simulated full-spectrum SUPERMLEDTM high-power light source combined with the Kohler lighting system can easily obtain clear images with equal brightness, high contrast, and soft color temperature from 4x to 100x observation, and can easily distinguish stained colors such as blue, purple, and pink that are difficult to restore with high fidelity under ordinary microscopes

High-contrast objective lenses for observing blood cells, chromosomes, and microorganisms

The new ECGO infinite bidirectional chromatic aberration calibration system objective lens with a new optical architecture has three zoom distance designs of 45mm, 60mm, and 95mm, which can balance high resolution and long working distance, as well as special biology-specific 40x and 100x coverslip-free objective lenses, making it easier for users to capture microscopic structures of bacteria and chromosomes more clearly during coverslip-free sample detection.

A tool for observing details of animal and plant packaging - dark field condenser

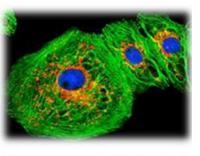

High-quality equal-path dark-field condenser provides more perfect dark-field illumination while suppressing the chromatic aberration of the objective lens, making the image edges of the observed sample sharp and clear, not only ensuring uniform background, but also ensuring uniform brightness throughout the field of view

Easy acquisition of high signal-to-noise ratio fluorescent images

Using a traditional fluorescence microscope to take high-quality fluorescence images takes up a long time for users: the background is not black enough, the signal is not strong enough, the details are unclear, and the quenching speed is too fast... Moreover, we use OD6 high transmittance IBS hard coating filter, self-developed ultra-high-power LumiCite series solid-state fluorescence dedicated light source, fluorite material high transmittance high-resolution fluorescence objective lens, electronic shutter, software programmed exposure control, making fluorescence shooting no longer difficult, and work efficiency has improved by leaps and bounds.

Observation of polymer materials, starch, crystals, cosmetics, and traditional Chinese medicine - polarizing

For the above applications, high-performance polarizing accessories are essential. We use a seventh-generation thin polarizer with a higher extinction ratio and no change in color temperature to improve the orthogonal background contrast. The standard 45mm polarizer can be placed at the light source outlet, and the 30mm polarizer can be placed in the DIC slot of the objective lens turntable. It is extremely convenient to push in and pull out, and there is no need to increase the cost of purchasing additional slot accessories.

	Photo, Video Capture, Calibration & Measure, Parameter					
	Adjustment etc.		L			
	Motorized System, Work With SC53F2, SC63F Motorized Body, No.	ed To Order	Full Set:		1	I
	Motorize X/Y Stage,					
	Surface Treatment: Anodizing + Wear-resistant Ceramic Coating					
	Moving Range 118x76mm					
	Max Speed 150mm/s (2mm Ball Screw Pitch)					
	Repetitive Positioning Accuracy: Bidirectional <1µm					
	Positioning Accuracy ± 2µm	•	•	•	A54.2206-30	HSG3000
	Resolution Minimum Step Size 0.03μm					
	Verticality<10 arcsec					
	Two-phase Stepper Motor					
	Eliminating Gaps Ball Screw					
	Weight 3.5kg,					
	SDK Support				1	
	4 Slides Holder For Motorized X/Y Stage	•	•	•	A54.2206- 30SH4	HSG-HLDT3
Motorized	Motorized Z Axis With Coded System, Directly Install On SC53F					
System	Body					
	Surface Treatment: Anodic Oxidation					
	Subdivision Accuracy: 200 Steps					
	Step Angl: 1.8°					
	Multi Circle Encoding: Support					
	Step Accuracy: ±0.01μm	•	•	•	A54.2207-3	GFDBX3
	Drive Motor: Two-phase Stepper Motor					
	Connection Method: Rigid Coupling					
	Computer Control: Support					
	Handle Control: Support					
	Weight: 0.85kg					
	SDK Support					
	Quarc Controller, Support Computer Software Control Motorized XYZ				A54.2208-M200	M-DRV-200
	Stage + Motorized Nosepiece, Power 24V DC		_	_		
	Toton Joystick, Directly Control Motorized XYZ Stage + Motorized		•		A54.2208-MCP	M-CP2
	Nosepiece				710 HZ200 HIG.	0. 2
	Immersion Oil 8ml, Reflect Ratio=1.518, Low Viscosity (135CST)	•	•	•	A50.2201-1	IMMOIL-8CC
	Chinese Standard Power Adapter 220V/24V/36W DC	•	•	•	A50.2203-2	GST36U24-P1
Other	Dust Cover	•	•	•	A50.2204-1	COVER-03
00101	Latex Gloves	•	•	•	A50.2204-2	WF7.5MR
				1	450,0004.0	MR6-T43
	Hexagonal Tool Kit 3#, 4#	•	•	•	A50.2204-3	WIN0-143
